ANNUAL E-GOVERNANCE REPORT
2020-2021

E-governance, meaning 'electronic governance' is using information and communication technologies (ICTs) (such as Wide Area Networks, the Internet, and mobile computing) in managing different activities such as academics, administration, finance and other related matters at the institution for the purpose of enhancing governance. The application of ICTs helps in improving transparency, providing speedy information, dissemination, improving administrative efficiency and public services in all the aspects of education. Educational institutions may have various requirements that include computerization and management of processes such as registration, admission, student information, classes, time table, transport, attendance, library, salary and expenses, examinations, performance, grades, hostels, security and reports. Many of the software providers allow their clients to choose from the available modules to suit their needs. In this paper, an attempt has been made to discuss the concept of E-Governance and use of latest application and initiatives in education sector.

Elements of E-Governance

Maulana Mazharul Haque Teachers' Training College is indeed committed to provide efficient and value-based knowledge to all. The e-governance or ICT indeed helps in transmitting the knowledge more effectively. Keeping in mind the importance of ICTs, the college initiated online biometric attendance for the students and teachers since 2013. The college is using various ICTs resources for teaching learning for the convenience of the students. During the corona pandemic the college conducted classes with the help of e-resource medium like ZoomApp, WhatsApp group etc.
